TRACKS FOR RAIL TRACTORS

Promotech offers a wide range of tracks suitable for straight line, circumferential and irregular surface applications down to min. radius of 100 mm (4"). The tracks can be fixed on both ferrous and non-ferrous materials by means of magnetic or vacuum units. Single track sections can be joined together to accomplish the required working track length.

Ring tracks

For circumferential applications from 200 mm OD up to 3000 mm OD (from 8" to 10 ft.)
Ring tracks can be equipped with various supports depending on the customer's needs.

Hi Flex tracks

For lots of circumferential and irregular applications down to 750 mm (30") radius.

Semi-flexible tracks

For straight line and irregular surface applications. It can be flexed to minimum radius of 5 m (16 ft) without permanent deformation.

Rigid tracks

For straight line applications and for going beyond workpiece and continuous welding edge to edge.

V-tracks

Customized tracks for Dragon, Dragon HS and Dragon Battery cutting tractors.

VACUUM TRACK SYSTEM

AGR-0541-10-20-00-0 for 230 V
AGR-0541-10-10-00-0 for 115 V with UK plug

- System provides firm grip on both ferromagnetic and non-ferromagnetic materials (aluminum or stainless steel constructions)
- Lightweight and modular design enables easy adjustment and fitting of the system to specific needs depending on welding or cutting applications and working positions (e.g. flat, horizontal or vertical)

Serial connection

- Entry vacuum unit (1 unit per track)
- Middle vacuum units (up to 5 units per rail track or up to 7 units per flexible trackway)
- Extension vacuum unit (for serial connection)

Parallel connection

- Entry vacuum unit (1 unit per track)
- Middle vacuum units (up to 5 units per rail track or up to 7 units per flexible trackway)
- End vacuum unit (for a single track or parallel connection)
