OVERVIEW

COMPACT DRILLS

The compact design and excellent weight-to-power ratio make these mag drills a popular choice for customers. With a milling capacity of up to 36 mm, dual bars guide system for extraordinary stiffness and adjustment free operation, and increasingly common battery drive, these machines are ideal for site work.

MEDIUM-SIZED DRILLS

The exceptionally wide range of mag drills in this segment ensures that every customer will find a machine perfectly suited to their specific application, regardless of the tool used, such as HSS and TCT cutters or twist drills. All drills are equipped with smart electromagnetic bases including many advanced systems.

TAPPING & DRILLING MACHINES

The most advanced and powerful mag drills feature ability to tap pre-drilled holes, stable speed regardless of load changes, continuous speed adjustment to optimize working conditions depending on diameter, steel grade or tool type, LED indicator to facilitate proper operation and increase work safety, both overload and overheat protection to prevent misuse of the machine and many more.

As a long-standing manufacturer of mag drills popular with customers, Promotech introduces quick change tapping system including wide range of accessories to perform both through and blind holes tapping

- TC - Tapping Chucks MT2, MT3, MT4 featuring securing nut (8 models altogether)
- TA - Tapping Adapters without safety clutch for tapping tools size M3 up to M42 for through holes (26 models altogether)
- TASC - Tapping Adapters with Safety Clutch for tapping tools size M3 up to M42 for blind holes (26 models altogether)
- RA - Reduction Adapters to extend the scope of tapping tools for use with particular tapping chucks (5 models altogether)

ATEX DRILLS FOR HAZARDOUS ENVIRONMENTS

ATEX drill family conform to II 2G Ex h IIC 135°C (T4) Gb and II 2D Ex h IIIB T135°C Db requirements for equipment used in hazardous environments such as oil drilling platforms, petrochemical plants, oil refineries, shipbuilding and petrochemical industry, where electric appliances are prohibited for safety reasons. Combination of pneumatic drive and permanent magnetic base eliminate the need of electric power supply allowing for a safe use in Ex zones and where hazardous, flammable or combustible vapors, liquids, dusts or residues may be present.

RAIL DRILLING MACHINES FOR ALL RAIL STANDARDS

With range of most common and custom-made positioners and templates our drilling machines are able to suit any required rail standards worldwide. Customers can choose from three supply options. Namely electric motor, petrol motor or battery drive. All models enable drilling of holes up to 36 mm in diameter, whereas their compact and lightweight design make them ideal solution for site work.

HYDRAULIC PUNCHERS

The PRO-60 HP and PRO-110 HP hydraulic punching machines produce holes in seconds pressing a tool known as a punch die through a metal workpiece. Available in two models with 35 ton and 47 ton punching power, these portable machines speed up the production of holes and slots of different shapes, such as round, oblong, oval or hexagonal with a diameter of up to 27 mm. The double action design of the fully automated punch and return minimizes cycle times and significantly increases productivity.

PRO-110 HP	16 mm	110 mm	27 mm	25 x 18 mm	8 sec	47 ton	YES

HSS/TCT CUTTERS, COOLANTS/LUBRICANTS & AUXILIARY ACCESSORIES

Annular cutters are specialized design bits for milling through steel much faster than regular drill bits. We supply HSS cutters with diameters up to 65 mm and cutting depths up to 100 mm and TCT cutters with diameters up to 160 mm and cutting depths up to 100 mm.

Eco-friendly HD-CUT cooling/lubricating, non-corrosive, biodegradable coolants offer superior properties and produce outstanding tool life and cut finish. We also offer a full range of other accessories for a variety of drilling applications.

VACUUM PAD FOR MAG DRILLS

Special type of clamping device that enables compact mag drills to work effectively on thin and non-ferrous materials.

BENEFIT FROM OUR EXPERTISE

Depending on the model chosen, our drills incorporate a range of innovative systems and solutions based on the expertise we have gained over 35 years of engineering.

PROMOTECH®

PROFESSIONAL MANUFACTURER OF PREMIUM MACHINES FOR METALWORKING INDUSTRY

Promotech is an innovation driven ISO 9001:2015 manufacturer of professional metalworking machines, welding automation equipment and industrial systems designed for structural steel fabricators, heavy machinery manufacturers, shipyards and other metal machining companies

Main product lines:

- mag drills, pneumatic drills, rail drills and hydraulic punchers
- weld preparation/portable and stationary bevellers for plates and pipes
- welding and cutting portable mechanisation equipment
- welding and cutting automated systems

Our products:

- offer solutions to reduce cost and increase productivity
- are designed and engineered for long term use in tough industrial conditions
- meet the requirements of the most demanding clients and markets worldwide
- are made in Poland according to the highest quality standards
- include top quality components
- are thoroughly tested for quality approval
- proved to be extremely reliable with a variety of practical applications in most difficult climatic environments
